Professional Summary

Senior Business Analyst with 7+ years of professional experience translating business requirements into data-driven BI solutions across insurance, healthcare, research and higher education. Experienced in stakeholder management, requirements gathering, BI reporting, SQL, data quality, governance, automation, UAT, Agile delivery, and process improvement. Adopted responsible AI.

Work Experience

Senior Business Analyst (BI Analyst), *University of Nebraska at Omaha (UNO), Omaha NE* **Apr 2024 – Sep 2026**

- Led requirements gathering and UAT with stakeholders and customers, delivering self-service Power BI and Tableau dashboards for acquisition, retention and outcome KPIs (graduation, enrollment, student success) to support strategic decision-making.
- Established data governance and documentation standards through metadata dashboards, report catalogs, and data dictionaries, reducing reliance on third-party tools and improving data transparency, consistency, and maintainability.
- Built Salesforce (CRM) and PeopleSoft (ERP) reporting and cross-system reconciliation dashboards that automated data validation and auditing, achieving approximately 85% improvement in process efficiency and saving up to 4 hours per reporting cycle.
- Modernized BI delivery practices through the adoption of Agile workflows, Git-based version control, SQL standards and optimization, templates, code reviews, and Jira boards.
- Led the team's GenAI project, mentored colleagues on responsible AI adoption, and guided interns on the predictive modeling and salesforce projects to support the IESS strategic initiatives.

Senior Business Analyst (Reporting & BI Analyst) , *Creighton University, Omaha NE* **Feb 2021 – Feb 2024**

- Partnered with senior leadership and cross-functional stakeholders to translate business requirements into Power BI, Tableau and SSRS solutions on CRM data (Advance, Blackbaud), supporting revenue, performance, engagement for executive decision-making.
- Developed targeted CRM-based customer segmentation and reports through Power BI dashboards to monitor business performances & operational KPIs that raised over $500K from 2,300+ donors.
- Optimized SQL queries, reducing execution time by 75%, and enhanced data quality checks, improving operational efficiency by 95% across all advancement reporting.
- Established data governance practices through data dictionary, process documentations, data models, report catalogs and metadata assets, laying the foundation for the university's enterprise Salesforce CRM implementation.

Business Analyst (Data Analyst/ BI Analyst/ Data Engineer), *Larsen & Toubro InfoTech, India* **Oct 2016 – Dec 2018**

- Designed SSRS reports and interactive Qlik dashboards for insurance claims, bonds and liabilities, improving visibility into claims operations, fraud trends and operational KPIs, enabling faster business decisions.
- Automated ETL workflows and manual reporting processes using SSIS and Informatica PowerCenter, eliminating 90 hours of manual effort while improving reporting accuracy, reducing manual human errors and increasing overall operational efficiency.
- Optimized SQL queries, stored procedures, views, and database objects across different Databases, reducing report load time by 75%.
- Partnered with cross-functional teams to troubleshoot production issues and validated the reports.
- Analyzed claims and policyholder data to identify fraud patterns, evaluate customer lifetime value, support premium pricing decisions, and improve reporting performance and reliability.

Additional Professional Experiences – Research, Internship & Part-Time (during M.S.)

Data Scientist intern, *Nest Global Solutions, Newark NJ* **Sep 2020 – Dec 2020**

- Developed ML (Machine Learning) and NLP solutions for healthcare information retrieval through chatbot/ search engine, including sentiment analysis models achieving up to 83% accuracy in text classification and 80% in sentiment analysis.
- Built end-to-end data pipelines from collecting raw data, performing exploratory data analysis (EDA), automating data preparation including AWS-based cloud data pipelines and semantic search APIs to connect similar users, with more accurate resources and enable future context-aware retrieval.

Research Assistant, *under Professor Dr. James Geller & Dr. Soon Ae Chun, NJIT, Newark NJ* **Nov 2019 – Dec 2020**

- Collected data by web scraping using Python, performed exploratory data analysis (EDA), data mining, and preprocessing, named entity recognition (NER), and sentiment analysis to support social media and misinformation detection.
- Developed and deployed a Python Flask web application for fake news detection (search engine) using NLP, Docker and cloud services, improving text classification accuracy from 95% to 97% through feature engineering and model optimization.
- Presented research at the ACM Digital Government (dg.o 2021) Conference and earned the Best Poster Award for the web application and comparative model study.

Outreach Assistant, *for Graduate Women in Computing Society (GWiCS NJIT), NJIT, Newark NJ* **Oct 2019 – Dec 2020**

- Coordinated STEM outreach events, workshops and guest speakers, managing and coordinating logistics and communications with faculty, alumni, public schools and community partners.
- Established volunteer recruitment and onboarding processes, supported executive committee succession planning, led knowledge-sharing through documentation and digital communications through social media marketing and discussion channels for the society.

IT Support Engineer, *IST Service Desk, NJIT, Newark NJ* **Jun 2019 – Dec 2020**

- Provided frontline technical support to hundreds of students, faculty, and staff by resolving 10-30 support requests per week involving user accounts, software, VPN, email, network connectivity, and system access to minimize operational disruptions.

Core Competencies

- **Business Analysis**: Requirements Gathering, BRD/ FRD, Stakeholder Management, Business Process Analysis, Gap Analysis, Process Improvement, Process Mapping, Use cases.
- **Business Intelligence & Analytics**: Dashboard Development, Data Visualization, Descriptive Analytics, KPI Reporting, Data Modeling.
- **Data Governance**: Data Quality, Metadata Management, Data Catalog, Report Catalog, Data Dictionary, Data Mapping, Data Lineage.
- **AI, Data Science & Automation**: GenAI tools (ChatGPT, Claude, MS Copilot, Google Gemini), Prompt Engineering, Natural Language Processing (NLP), Large Language Models (LLMs), Predictive Modeling, Machine Learning, Deep Learning, Neural Networks.
- **Delivery**: User Stories, User Acceptance Testing (UAT), Agile Methodologies, Scrum, Backlog Management.
- **Collaboration & Communication**: Mentoring, Cross-functional Collaboration, Facilitation, Knowledge Sharing, Continuous Improvement.

Technical Skills

- **BI, Reporting & Analytics**: MS Power BI (DAX, Power Query, Report Builder), Tableau (Desktop, Prep, Flows), SQL Server Reporting Services (SSRS), Qlik, Cognos Analytics, MicroStrategy, SAP BusinessObjects, WebFOCUS.
- **Data & ETL**: SQL, Python, R, SQL Server Integration Services (SSIS), Informatica PowerCenter, Talend.
- **Application Development, Big Data & Cloud**: Apache, Spark SQL, AWS, MS Azure, GCP, Python Flask, Docker, REST APIs, ShinyApps.
- **Project & Delivery Tools**: Jira, Azure DevOps, Smartsheet, MS Visio, MS Excel, MS PowerPoint, RapidMiner, Minitab, SAS JMP.
- **Enterprise Systems, CRM & Data Governance tools**: ERP tools (PeopleSoft, Blackbaud Raiser's Edge), CRM tools (Ellucian Advance, Salesforce), Data Governance tools (Data Cookbook, OpenMetadata, Secoda, MS Purview), Git, GitHub, GitLab.

Certifications

- Salesforce Certified Tableau Data Analyst
- AWS Certified Solution Architect – Associate.
- Additional professional development through Coursera, LinkedIn Learning, O'Reilly, Microsoft Learn, and Salesforce Trailblazer.
- Generative AI Trained from University of Nebraska at Omaha (UNO) as a teacher, staff and student.

Professional Activities & Recognitions

- Co-authored & presented a research paper in the ACM D.G.O'21 Conference and won the "**Best Poster Award**".
- Higher Education Data Engagement - Ranked #6 among community participants in Higher Ed Data World (HEDW) for knowledge sharing and engagement and active contributor & community member of the Higher Ed Tableau Users Group (HETUG).
- Represented the team at UNO's first Spring AI Summit as presenter to share Artificial Intelligence (AI) initiatives and projects.
- Recognized by faculty for leading both applied machine learning research and Women in Computing outreach simultaneously and received NJIT's highly competitive graduate award.

Volunteer Experiences

- Nebraska Women in STEM Volunteer – Supported community events and contributed to the 2026 award committee and part of 2027.
- Data Visualization Society, Big Brothers Big Sisters & AnitaB.org – Contributed to community learning through mentoring, teaching, blog writing and committee participation.
- UNO & Creighton University - Participated in wellness committees and staff volunteer initiatives.

Education

- Master of Business Administration (MBA), *University of Nebraska at Omaha (UNO), Omaha, NE* *(In Progress)*
- Master of Science (M.S.) in Data Science, *New Jersey Institute of Technology (NJIT), Newark, NJ* Dec 2020
- Bachelor of Engineering (B.E.) in ECE, *Anna University, Chennai, India* Aug 2016
